**SEBC Attendance at CGI Booth up 25% Over 2007**  
**Investments in New Products and Marketing Initiatives Yield Results**

**MIAMI – August 4, 2008** – CGI Windows & Doors Inc., a leading manufacturer of premium, impact-resistant windows and doors, reported a 25% increase in traffic at its booth at the recent SEBC show. “We were quite pleased to see an uptick in attendance at our booth given the market climate,” says Brian Evans, CEO, CGI. “Although the industry is slow, we are happy that our investments in new products and marketing initiatives are paying off in strong growth and interest in our products”, he added.

CGI has accelerated its product development efforts over the last two years including the new Series 560 sliding glass door and the Series 360 single hung. The Company expects to launch its new large format fixed window and horizontal rolling window in 2008. “Our new products are generating a lot of interest” says Steven Dawson, Executive Vice President Sales, CGI. “We were thrilled that our single hung was selected to retrofit 400 guest rooms at the Palm Beach Breakers Hotel. It is projects like these that solidify CGI’s quality reputation and image”, he added.

**About CGI**

CGI has a strong reputation for offering architectural-grade impact windows and doors with unique features and high-quality construction that exceed industry standards. CGI products have been specified and installed in some of the most prestigious residential and commercial projects in South Florida, including the Breakers – Palm Beach Hotel historical restoration. Recently, CGI was named one of the industry's top 100 window companies by Window and Door Magazine. Established in 1992, the company was the first impact window and door manufacturer to offer PVB laminated glass designed exclusively to meet the Miami-Dade County impact-resistant protocols.
