CGI introduces Miami-Dade County Approved Large Missile Impact Resistant Single Hung Window

-- CGI responds to market needs by developing a high performance Single Hung window --

Miami – May 22, 2006 – Construction Glass Industries Corporation (CGI), Florida's leading manufacturer of architectural grade high end aluminum impact resistant windows and doors, has introduced another Miami-Dade County approved impact-resistant product, its Series 360 Single Hung window. Miami-Dade County is considered to have among the most stringent building code requirements in the country.

"We think our customers are going to be excited about our new Single Hung window line. We were able to design another competitively priced window with features and performance that far exceed industry standards," explained Flavio Quesada, president of CGI. "Adding a high performance Single Hung window to our portfolio complements our line of Casement, Project-Out, and Fixed Windows, and our line of French doors," he added.

Unlike most Single Hung products, the Series 360 Single Hung has received Miami Dade approval for sizes as large as 54" x 96" and 42" x 120" with design pressures as high as +100 and -210 psf. The windows are available in standard White, Bronze or Driftwood ESP paint finishes. Other features include a concealed balance system, a patented carrier-slide mechanism that provides ultra smooth operation, enclosed sill design, tubular rails on all sides of the sash, easy glass replacement via a stationary upper sash, custom self locking sill mounted egress locks, and Vanceva® Storm laminated glass.

CGI's line of all aluminum windows offers a similar look to wood windows without the concerns of rot-decay and maintenance issues associated with wood windows, creating a long lasting solution for hurricane protection.

About CGI

CGI has a strong reputation for offering architectural grade impact windows and doors with unique features and high quality construction that exceed industry standards. CGI products have been specified and installed in some of the most prestigious residential and commercial projects in South Florida, including Fisher Island. Established in 1992, the Company was the first impact window and door manufacturer to offer PVB laminated glass, designed exclusively to meet the Miami-Dade County impact resistant protocols. The company has recently moved into a new 110,000 square foot facility in the Miami area.
